

“We’re sitting together around a table, talking about attitudes and careful design, a pretty witty conversation. We’re a clever bunch, after all. There are plenty of chairs, and if there aren’t enough, we’ll fetch some more from the collection!”
 The hallmark of everyone sitting together here is passion, along with bold and carefully conceived design that challenges the status quo. Around this table, they thrash out issues of aesthetics and proportion, use of materials, objects suited to our everyday lives, and durability. Imagine you were there. What would you ask? And before you leave, do take a postcard to remind you of this discussion on these chairs that convey so much about attitudes, design, and wit. (Sebastian Marbacher)
